Grasshopper

The grasshopper has been held in high regard by many cultures, especially the Chinese. Their powerful legs enable them to make astonishing leaps. With extreme sensitivity, they tune into the vibrations around them. Trust your own rhythms. Let instinct guide you. Take a leap forward. Ted Andrews states, "Remember, a grasshopper always leaps up or forward. It doesn't leap backward."

Quote

"The journey of a thousand miles begins with a single step." ~ Confucius

Follow Your Star

Epiphany is the day the wise men arrived in Bethlehem. Perhaps their arrival was unexpected, as were their gifts. Yet, they knew where they were going and had no doubts. They followed a star that led them to a newly born king.

According to Wikipedia, an epiphany "is an experience of sudden and striking realization." Your epiphanies in life are those Aha! moments that catch you unexpectedly. One minute you are pondering something, then the next minute Wham!

Such a moment could be as simple as a glowing sunrise that takes your breath away. Or, as profound and complex as a deeply personal spiritual experience that defies words.

Each epiphany in your life is a leap in consciousness. Subtle, intense, large, or small, your personal epiphanies add up to transformation in your life. That's big change.

You are leaping ahead in 2013. Experiencing epiphanies, riding the wave of transformation, surfing consciousness, your eye on the horizon as Spirit calls you forward. Follow your star — it will lead the way. Home.
